Qingyun **Li**

Computer Science at the University of Washington

qxli2@cs.washington.edu | qingy1337 | Google Scholar | OpenReview | Hugging Face

Research Interests

Language models, tokenization, inference-time algorithms, reinforcement learning, and computer vision.

Education

University of Washington — *Seattle, WA*
Bachelor of Science in Computer Science — *2025–Present*
Paul G. Allen School of Computer Science & Engineering

Everett Community College — *Everett, WA*
Associate of Arts and Sciences in Mathematics — *2023–2025*
President's List; graduated with a 4.0 GPA.

High School
High School Diploma — *2024–2025*
Graduated in ninth grade with a 4.0 GPA.

Research Experience

University of Washington NLP Group — *Seattle, WA*
Undergraduate Researcher. **Advised by Prof. Luke Zettlemoyer.** — *Present*
First-author papers published at COLM 2026, AACL-IJCNLP 2026, and NeurIPS 2026 (see below).

Tesslate AI
Research Scientist, Generative Models — *Mar 2025–Jun 2026*
Led research and development of state-of-the-art open-source UI-generation and agentic coding models, including **OmniCoder-9B**, which reached #4 on Hugging Face's trending models and received more than 15,000 downloads.

Publications

Learning Spectrum-Matched Gap Sequences for Shellsort — *Main track • Poster*
Qingyun Li, Yunjin Li, Yunqi Li, and Ruoyun Li — *2026*
Conference on Neural Information Processing Systems (NeurIPS)

Language Models Detokenize, But Only for Themselves — *Main track • Oral*
Qingyun Li and Ruoyun Li — *2026*
Conference of the Asia-Pacific Chapter of the Association for Computational Linguistics and the International Joint Conference on Natural Language Processing (AACL-IJCNLP)

Token-Level Control or Just a Better Mean? Isolating the Gains of Adaptive Decoding — *Main track • Poster*
Qingyun Li and Ruoyun Li — *2026*
Conference on Language Modeling (COLM)

An Enhanced Algorithm for Automatically Capturing the Desired Moment in Photography — *Oral*
Qingyun Li, Ruoyun Li, and Yunqi Li — *2025*
IEEE International Conference on Consumer Electronics (ICCE)

Planning and Automatically Capturing the Desired Moment in Photography
Zhiyun Li, Ruoyun Li, and **Qingyun Li** *2024*
IEEE International Conference on Consumer Electronics (ICCE)

Patents

Capturing and Processing Content for In-Vehicle and Extended Display, Curated Journaling, and Real-Time Assistance During Vehicular Travel *U.S. Patent*
Jean-Yves Couleaud, Tao Chen, Serhad Doken, Zhiyun Li, Ruoyun Li, and **Qingyun Li** *2026*
No. 12,675,918; issued July 7, 2026

Systems and Methods for Capturing an Image of a Desired Moment *U.S. Patent Application*
Zhiyun Li, Ruoyun Li, and **Qingyun Li** *2025*
Publication No. 2025/0343989; published November 6, 2025

Honors & Awards

2026 **Kyril Faenov Endowed Scholarship in Computer Science & Engineering**, University of Washington

2023 **USA Computing Olympiad, Gold Division**, Advanced to Gold at age 11; perfect score while advancing to Silver at age 10

Academic Service

2027 **Reviewer**, AAAI Conference on Artificial Intelligence (AAAI); International Conference on Learning Representations (ICLR)
